

## Spice Up Your Relationship By Wearing Sexy Baby Doll Lingerie

If you've been thinking about ways to spice up your love life, lingerie can often serve as a stimulating enhancement to any relationship. Wearing sexy lingerie can often give a woman that extra boost of self-confidence that may be needed to feel good looking and sexy for their mate. Unfortunately, not all types of lingerie look stunning on every body type. However, one of the garment types that will generally look great on women ranging from petite to full figured, is baby doll lingerie.

If you're unfamiliar with baby doll lingerie, it is a type of forgiving undergarment in that it provides support for the breasts and is usually loose fitting around the tummy area and resembles a loosely worn dress that flows to the hips. The two most popular styles of baby doll lingerie are the open front, and the closed front. The open front style separates to the sides exposing the belly button area, while the closed front takes the form of commonly worn maternity dresses, just sheerer and shorter than the standard maternity dress.

### Styles of Baby Doll Lingerie

There are a number of different baby doll styles that women can now consider. If you tend to be a somewhat reserved woman, you may prefer to wear baby doll lingerie that has a closed front and is not sheer with a matching full-back panty. For the more daring, a short, open front baby doll made of a sheer mesh or net fabric may be what you're looking for. Many come in a peek-a-boo style with strings that can be untied to expose the breasts. They also generally come with matching full-back, g-string, thong or crotchless panties. If you are a bit on the timid side, you can accessorize the garment with a robe that will allow you to reveal only what you want. Most importantly, you want to feel comfortable in any type of lingerie that you wear, so you want to make certain that you are not feeling self-conscious by wearing a garment that is overly revealing. If that's the case, wear something less revealing the first time, then gradually ease into the more provocative and revealing styles as your comfort level increases. It won't be long before you are truly loving it and bringing out the beast in your partner.

Babydolls are now available in a wide variety of different fabrics. Typical fabrics include satin, lace, lycra, denim, mesh, chiffon, leather, faux leather, and vinyl. The vinyl fabric is also commonly referred to as PVC, patent leather, or wet look because of its shinier appearance.
