

## Tacori Wedding Bands For Him

Gone are the days of a man's wedding band being a simple circle of gold or platinum. Of course, these traditional options are still available and many men will prefer the simpler statement. However, for those men looking for a little something extra, there is a huge variety of wedding rings to select from.

The Tacori collection has a wide range of wedding bands for the male. From the simple and elegant platinum band, to bands set with diamonds, and the famous engraved Tacori rings.

Hand worked. Tacori wedding bands are well known for being hand made and of a superior quality that will last a lifetime. Many couples love the idea of their wedding rings being made by the one renowned jeweler. This can be a great way to have either matching wedding bands, or wedding bands designed to compliment the other. For example, the bride may have chosen an intricate Tacori engagement ring with engraving and filigree work. While the husband may not be wanting something quite so feminine or intricate, he may like to have a portion of the patterning or carving worked in a more simplistic or masculine manner on his wedding band.

There are also male wedding rings carved or engraved with the eye catching and unique Tacori designs. Scrolls and leaves are two of the more well recognized Tacori signatures for men.

Diamonds. More and more men are opting to have their wedding band set with diamonds. While this trend was initially started by the rich and famous, it has become much more mainstream. Diamonds in a Tacori band can be as subtle or stated as you require. Some men opt to have the same size or number of diamonds in their wedding band as their wife is having in hers. This can be a nice alternative to the totally matching his and hers wedding bands.

Matching his and hers. Many couple decide to have matching his and hers wedding bands. This is a great way of showing a united front to the rest of the world. Matching his and hers wedding bands can be very eye catching and are statements in themselves. There are many Tacori wedding bands that are suitable for both men and women.

Platinum, gold, or two tone. One of the biggest questions facing a male is the type of metal he wants his wedding ring to be made from. Platinum is becoming increasingly popular due to its high shine, luxurious look, and the fact that it will never wear or tarnish. These can be fairly major considerations for any male who may not be quite so diligent in caring for a piece of jewelry as his wife.

Rhodium plated white gold can be a more cost effective option in the short term. However, the rhodium plating needs to be touched up periodically to maintain the high shine, and to prevent the grayer color of the white gold showing through. Platinum or white gold wedding bands are also going to always look fantastic with a stainless steel watch.

Tacori wedding bands are available for men in platinum, white gold, yellow gold or two tone. Two tone wedding rings can be a great way of obtaining visual interest in a wedding band while still maintaining a very masculine look. Two tone can also be an excellent way to perhaps tie in the male's stainless steel watch and the wife's gold jewelry, for those couples who want everything to match.

Custom made Tacori wedding rings for men will not only last a lifetime, but are available in a wide range from simple traditional bands to unique and decorated wedding rings in the designs that Tacori has become famous for.
