

How To Have A Little Fun With Chair Cover Rentals

If you want to put flavor into your event, chair cover rentals are a necessity in this day and age. Just like tablecloths, chair covers are becoming more and more necessary as people realize that rented chairs do not fit in with the style of their design. Because chairs can often appear worn or have an over used look to them, chair covers have long been the way to cover them up while bringing a little color magic to the party. Most linen rental companies' inventory tends to be dominated with solid colors and most of the covers that are the most heavily promoted are simply white, and nothing else. While a solid color can be elegant, it is no longer necessary to have to settle. Making chair covers original is not as difficult as many people think. It is actually pretty easy to have fun with chair covers.

Using Colors

When many planners initially think of chair cover rentals, they tend to see one thing; rows and tables full of stark white linen. While this is always going to be a timeless and classic look, this is not the only way that chair covers can be done! There are typically two ways to add color to your chair cover rentals. The first is to simply find a company that has a big selection of different colors to choose from or even a **wedding rentals** company that offers custom made linens. If you find a solid color you like, you can simply use ribbons or flowers attached to the chair, adding a hint of color without going overboard or ruining the look of the design. Check out the many different chair cover rental styles and colors at <http://www.magicalpartyrentals.com>

Designate Different Sections

Many events have different tables that designate different sections. If your event has a head table, or multiple tables with "special or distinguished" guests, you may want to consider using colors or accessories from the chair cover rental company to designate these new areas. Using different colors, or different accessories for each table is a great way to add a fun and more individual feel to the tables at your event, not to mention they are easily identifiable by your guests.

Change up the Length

Chair cover rentals are often visualized as draping onto the floor. However, you may want to do a little experimentation with your rental company so you can specifically see what you like. It is possible to have chair covers that are too short, but the most elegant look is to have covers that are bit longer than they need to be. The fabric pools on the ground, making for a visually elegant feel. Research more information about chair cover companies at <http://xinqing-xinjing.blogspot.com/2008/05/wedding-linen-rental.html>

Change up the Fabric

Wedding linens are offered in quite a few different fabrics. Different kinds of fabric can be used to cover the chairs and tables. This gives you a few interesting options to experiment with. Everyone expects high quality linens, so using a different kind of fabric brings a new texture and idea to the table, which falls right in line with guests' expectations.

Only by implementing one of these ideas will be a great way to spice up your *chair cover rental* design. By mixing and matching more of these ideas, you can have chair covers that stick out from the rest of the events that have been attended by your guests. Chair cover rentals are often so boring that it can seem difficult to generate ideas to make them original or interesting. Learn more about chair cover rental design by visiting <http://lirastafford.com/2008/05/chair-cover-rentals.html>

Changing up colors, adding accessories, using colors to designate specific seating sections, and changing up the length and type of fabric are the best ways to be original, yet classy and elegant, at the same time.
