

## MMORPG Game Players Check Out Several Reviews Including Age of Conan

If you are looking to play an MMO game you are in luck. There are a wealth of online games that are great to play, easy to get to grips with and a great learning experience. Here are the top 4 MMO games at the moment that you can make part of your gaming life!

**Lord of the Rings:** This is a huge online game that spans across the magical and fictional land of Tolkien. Based loosely on the books and the films, you can play a number of characters such as hunter, a hobbit, an elf or other such characters. The graphics are outstanding, provided that your PC has a good enough graphics card to deal with the game, and the story lines are second to none.

Lord of the Rings Online is a superb RPG and will enthrall fans of Tolkien and people new to both gaming and to Tolkien's work. Interact with characters from the books and the films such as Aragorn and Gandalf.

**Age of Conan Hyborian Adventures:** The Age of Conan is a new online mass multiplayer game that is rich in both content and in adventure. In line with many fantasy games that are MMORPG's, Conan includes many features such as healing, spells, fighting and quests to level your characters up throughout the game. One thing that Conan has that others do not feature as much is blood and gore. You can behead your enemies in frighteningly realistic graphics, stab them repeatedly and kill them brutally. You may also see a few naked or topless people run past you, (in character form of course!).

You start the game as a slave rather than your character of choice, after the opening scenes, you can choose the class and the type of character you want to continue the game with. You can fight your way through the world of Aquilonia, Stygia and also Cimmeria, which are all graphically stunning.

**Eve Online:** This game has a dedicated following of players, new and old alike. Playing Eve Online allows you as the player to create and build an empire. While this may sound normal enough for games, the difference here is that you are doing all of this in space. Expansions are regularly offered to players to further the game play and make it new and exciting on many different levels.

The graphics on Eve Online are fabulous to say the least. The ships have beautiful and intricate detail, the starscapes and the solar systems are incredibly realistic and the span of the universe you are playing in is truly massive.

**World of Warcraft:** World of Warcraft is a legend and a veteran in the online gaming world. WOW brings lots of great things about online gaming into one place for you to enjoy fully. You have a huge variety of characters classes and races to choose from before you begin your adventure. Once you have done this, you can start your journey into WOW's world of Azeroth. There is a huge amount of content to get your teeth into on this online game and you will have a huge amount of fun doing so.

You can take part in quests, group quests, fight monsters in the stunning countryside and many other role playing activities.
