

## How Wedding Sparklers Can Light Up Your Special Day

Can you picture the big day? Your wedding day. The white dress, flowers, cake and of course the decorations. What kind of decorations would you use? For the actual wedding, maybe flowers, lace and candles. What about the reception? Maybe balloons, streamers, candles and what about wedding sparklers? Wedding sparklers are sure to give any reception a fun and magical atmosphere. They would definitely make your wedding stand out from many of the others that I am sure your guests have been too. Sparklers can make your wedding unique and give the guests something to talk about.

Wedding sparklers can be used at the ceremony, especially if you are having an outdoor wedding. How pretty would it be to have the bridesmaids and groomsmen holding a sparkler, providing lighting around the bride and groom while they say their vows, or the wedding party could hold sparklers outside the church along the walkway as the new couple exits the ceremony. What about at the reception? Is the reception outside? What a great way for everybody to enjoy themselves. You could have all the guests holding a wedding sparkler while the bride and groom have their first dance together or during the dollar dance. The people collecting the money could be holding sparklers.

There are so many ways that you can use sparklers during a wedding or a reception. Besides during the couple's first dance and during the dollar dance, you could also have everyone light a wedding sparkler during the toast and everyone could toast the new couple with different colored wedding sparklers. How pretty would it be to have a sunset wedding with sparklers lighting the path of your outdoor wedding. Can you picture that? The sun just starting to set, all of your guests are there, and the bride walks down the aisle or walkway with the soft flicker of sparklers lighting her path. That setting would make for some beautiful pictures and memories that will last a lifetime.

Another idea would be to have sparklers set up around the wedding cake. Wouldn't that make a beautiful picture to have your big tiered cake surrounded by sparkling lights? What a beautiful and memorable setting that would make.

Wedding sparklers can also be given away as party favors for your guests. The stems can be painted to match any color scheme and can be left by each person's plate at the reception. Wedding sparklers come in many different sizes. The sizes range from eight inches all the way to thirty-six inches. Make sure to get the sparklers that you think will last the longest so you can get the most enjoyment out of them. If you are using them outside, go for the bigger sparklers. If you are using them inside, you may want to go with a smaller size. It all really depends on what you want.

You can be very creative when planning a wedding. Use your imagination and see where you can fit wedding sparklers into your wedding day décor.
