

Carhartt Clothing - The Advantages of Carhartt Outerwear Vests

Vests can be very useful for someone that works in a less extreme climate but still needs some protection from the cold. A vest is also good for someone that needs more flexibility in their arm movement or doesn't want their sleeves to possibly get caught in moving machine parts.

Carhartt outerwear vests offer the same benefits as many winter coats, but with more maneuverability. This benefits the wearer because they can continue to work once the temperatures begin to fall, but still keep the full flexibility they desire unlike the constrictions they would feel with a coat or jacket.

Here are some benefits of wearing a vest during the colder months of the year:

Protects Your Core Temperature

After you protect your extremities, your core or torso is the most important part of your body to cover. By covering your chest with an insulated vest, you accomplish this without sacrificing mobility in your arm movement. In the Carhartt outerwear line, there are a number of quilt-lined vests that will provide extra warmth to the torso and help maintain core temperature during windy or chilly days.

Motorcycle riders have known for years that a good vest is worth its weight in gold while riding on a cold day. The biker is able to keep full movement of his arms but still keep his chest warm and protected from the wind and elements. Carhartt outerwear vests are ideal for this type of activity.

Provides You With Flexibility

There are many times at work or play where you want to stay warm, but you need to maintain the full range of motion in your arms. A vest is ideal for this. By having no sleeves, your arms are fully mobile to carry on whatever task is at hand without constriction. Carhartt outerwear vests have strong seams around the sleeve cutout area to ensure that the vest will not fray or tear over time as you work or play and rub against the cutouts.

Wind Protection

A quality vest will come with wind flaps and a drop tail for extra protection. Carhartt outerwear vests are no exception. Whether you are out riding your motorcycle or simply working on a very windy day, this attention to detail is what will separate a good vest from an exceptional vest.

Pockets

While a good coat will have many pockets for carrying tools and other essential items, a great vest is no exception. Carhartt outerwear vests come with deep pockets not only to keep your hands warm, but also to put your stuff in while on the job. Quality stitching in and around the pockets makes sure that the fabric is reinforced and strong enough for all the stuff you may carry. Carhartt outerwear is known for its durability and strength to ensure that your items stay put once secured inside.

Vests can be an essential part of your wardrobe if you live in a less extreme environment. Also, for motorcycle enthusiasts, they are a must have in your biking wardrobe, as they provide the warmth and protection that you need on the road during cooler weather.
