

Pet Grooming For a Healthy and Happy Pet!

Our pets are more than just animals who happen to live with us. They are also our friends and sometimes even our own family member. We should take care of them and even though some may raise an eyebrow, pet grooming is the “in” thing now.

Two of the most common pets that people have are dogs and cats. In this day and age these animals also have needs that we need to address. Since they are living with us we want them to be clean and we want them to smell good. That is why pet grooming is a must for any pet owner. Let's take dogs for example they are very playful animals and most of the time we play with them in our gardens or in the park. In those areas they can accumulate millions of bacteria while running in the grass or mud. The very basic thing we can do is to give them a regular bath as part of pet grooming. This will not cost you much since you only need clean water and dog shampoo. Just make sure that you clean your dog well so that the germs can be removed. Also brushing the dog's coat is recommended. This will remove tangles and dirt. It is also advised that you brush the dog's teeth twice a week to remove stains and bad odor. You can purchase dog toothpaste and brushes in most pet stores. For added grooming you can visit pet salons which offer, nail maintenance, special fur treatment and other things that will make your dog more beautiful to look at.

Now let's go to cats. They are much more difficult to handle than dogs when it comes to pet grooming. Since we all know that cats hate water they seldom take a bath and on the occasions that they do, you can be assured that it will be a very tough task for both you and your pet. But thankfully nowadays there are pet salons where you can avail of their services. Most of their services already include a bath, personal styling, trim of their fur and toenail trim. If you are willing to pay then this is a good and easy way to make sure your cat is well groomed. But if you prefer to give the cat a bath yourself then you should put him or her in a bathtub and put inside it something that he or she can cling to, like a wooden platform. The cat needs that so he or she will have something to scratch while you are giving the bath. After the bath use a towel to dry the cat. You can also comb the fur, especially for cats with long furs, they should be combed properly. As mentioned above, you can avail of grooming services in your local pet stores if you don't have the time to do it yourself.

Pet grooming is essential so your pet will live a long and healthy life.
